

TNS Call Guardian Authentication Hub is a managed end-to-end call authentication solution that analyzes real-time call events combined with STIR/SHAKEN authentication and validation of caller ID that allows operators to differentiate between legitimate users of communications services versus abusive, fraudulent and unlawful users.

TNS Call Guardian Authentication Hub is an integrated solution powered by industry leading solutions from TNS and Metaswitch. It includes TNS' Call Guardian analytics and robocall detection engine and Metaswitch's MetaSphere Qcall SIP application server.

- Available as fully hosted service.
- Accurately detects robocalls and with industry leading call analytics and authentication technology.
- Supports of illegal robocalls as defined by U.S. and Canadian regulators.
- verstat parameters as part of call validation to influence call treatment and handset display.
- Helps subscribers avoid answering and illegal robocalls as well as scam calls.
- the Caller ID at the origination point of the call, then Caller ID at the termination point
- Provides subscribers with a visual warning of

Features

- - detect problems as they occur.
- - full compliance with standards in ATIS test bed:
RFC 8224, RFC 8225, RFC 8226
ATIS 1000074, ATIS 1000080,
ATIS 1000082
- - management of private keys and signing for authentication.
- - analysis of over 1 billion call events daily across more than 500 operators.
- - caller reputation on over 1 billion telephone numbers.
- - support for DNO, invalid, unallocated, unassigned numbers, STIR/SHAKEN and big data analytics using machine learning.

Benefits

- - Call authentication framework that complies with direction of Tier 1 providers.
- - Block calls in the network allowed by the FCC & CRTC.
- - Network level solution that can be leveraged for branded calling and enhanced caller ID.
- - Cloud-based solution that scales up and down to any size network.
- - Ingests parameters from STIR/SHAKEN to provide improved call management for your subscribers.
- - Supports multiple network protocols (SIP, HTTP) and integrates with all major network elements.

The Most Trusted Partner for Solutions for Telecommunication Carriers or Providers

TNS addresses the evolving needs of network operators around the globe. As the industry evolves to IoT and 5G technologies, TNS leads the development of solutions to help carriers navigate a host of infrastructure complexities and maximize their network reach through the creation of unique multi-service hub solutions.
