

PRODUCT SHEET

TNS Toll-Free Database Service

Tap into the large toll-free market while delivering top quality service to your subscribers

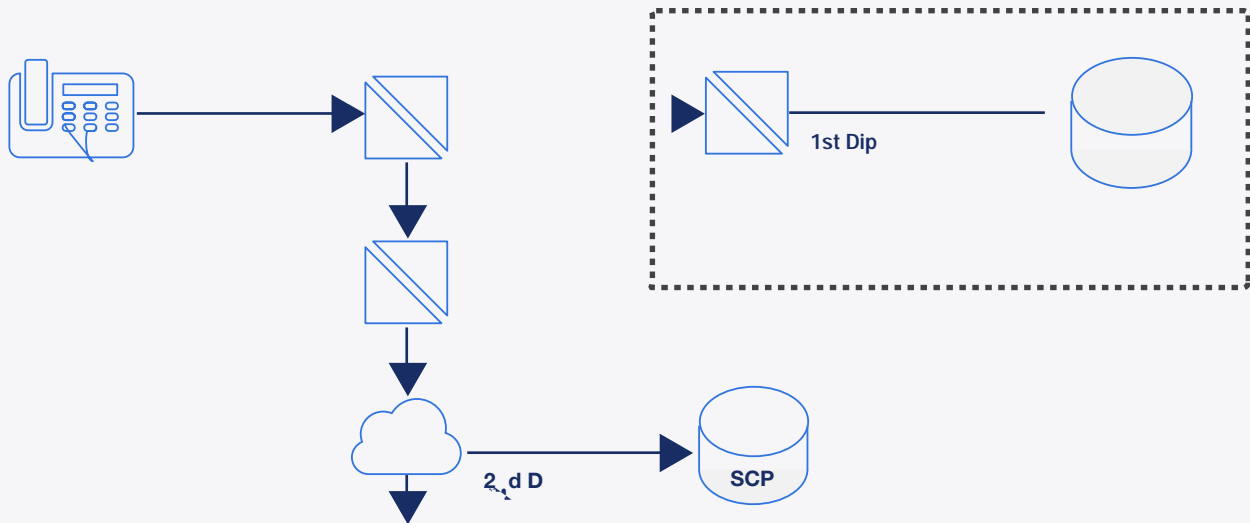

Access the TNS Toll-Free Database Service, available in 190 countries, to reach your subscribers. TNS Toll-Free Database Service is a global database of toll-free numbers, providing you with the ability to reach your subscribers in over 190 countries. TNS Toll-Free Database Service is available in the United States and Canada.

Global Reach and Reliability

At TNS, we own and operate our own toll-free platform (rather than using a third party), which ensures greater reliability. We also operate the largest independent Signaling System 7 (SS7) network in the world - which provides greater link diversity and reduces the points of potential network failure. We also operate a Global IPX network with multiple POPs worldwide. You can trust that our Toll-Free Database Service will connect toll-free subscriber calls seamlessly and swiftly.

8 Toll-Free

Worldwide Carrier - Fee Network Area

Features

North America and Fee - Full access to numbers in the United States and Canada; this service supports interstate, intrastate, inter-LATA and intra-LATA requirements

Access IP and SIP and ENUM - To facilitate customers' move to all IP infrastructure

CIC override - By using CIC override features, you can reach directly to your destination without any intermediate carriers in the path thus saving costs and creating additional revenues

Delayed Billing - Includes monthly Carrier Identification Code (CIC) summaries on 8xx queries and enables accurate Carrier Access Billing

24/7/365 - TNS provides ongoing customer support for setup, troubleshooting, referral, and billing inquiries 24 hours a day, 365 days a year

Local Care - Customer site deployment for high volume customers that is fully managed by TNS

Benefits

Reliability - TNS owns and operates a proprietary
